About Me

At the age of 13, I received my first diploma in Fine art. Canvas has always been a playground to my Creativity and Visualization. On learning computer skills, computer as now become my canvas. I see being a student of commerce and mass communication, as an advantage, Since, I can see any design from a wider perspective of its creation. Thus, My skill set is a blend of Art, Technique and Marketing Expertise. Working over the years for various firms and also teaching design at college has given me a great understanding of layouts, color balance typography. I see one of my major strengths being my adaptability. I believe in turning around my clients ideas, thoughts and words into a piece of art. I believe in Quality Work, Scheduling, Great Client Relations and Professionalism.
